

Role Title	<i>Senior .NET Developer</i>
Location	<i>Toronto, Ontario</i>

Who We Are

Newton's complete range of products of services are designed to automate the entire mortgage approval, underwriting and funding process by providing instant visibility into the entire business. By integrating all processes into simple to use systems, our aim is to free up time for whatever else our customers might choose to do.

Contributing to the growth of a game-changing product gets our team fired up! At Newton, we take ownership of our projects and work together to foster a fun and transparent environment. Our days are spent thinking through complex scenarios and tackling major challenges using innovative technology. We're agile in our process and responsive to the market, seeking to fundamentally improve an institutional industry. We are a team of experts, joined by outstanding partners, on a quest to build superior products and a top-notch company. With our HQ in the heart of Toronto and a growing office in Vancouver, we work, play, and win as a team. We enjoy spending time with one another and celebrate our accomplishments together.

What's The Role

Reporting to the VP Operations and Technology, you're part of a DevOps team that is focused on using the latest technologies and methodologies to develop and support innovative data driven solutions that make our clients successful and happy. You will take on technical responsibilities to translate and turn new ideas into reality, and remake legacy applications into best-of-breed in today's market. Your importance to our mission and direct contribution to our continued success cannot be understated.

You'll communicate directly with product managers and the DevOps teams located in Toronto and Vancouver and work alongside our top-notch client support and sales teams, who will socialize our customers' feedback internally, to conquer anything that comes our way.

You'll drive continuous improvement by identifying and championing change to our applications' architecture, design, and code for security, usability, ease of maintenance and integration. You'll work collaboratively to build exceptional customer support. You will find yourself surrounded by exceptional people, from all walks of life, in pursuit of a common goal. The growth you will experience in this role is second to none, as you are stepping into an environment with a firm commitment to professional and personal development.

The position is based in our head office in Toronto, Ontario, standard business hours Monday to Friday. Some evening and weekend work may be required and you may be required to be on-call after hours and weekends for support purposes. This position may be permanent, contract or contract-to-permanent.

Who You Are

It's essential that:

- You're fanatic about application development and support and are flexible and open to new ideas or change.
- You have significant experience in application development using C#.NET, JavaScript, JSON, AJAX, XML, MS SQL
- You have some experience in development of Web Services and other integrating technologies
- You're reasonably fluent in VB6 and COM+
- You bring significant knowledge about user centered design and user-driven development
- You're comfortable working within an agile SDLC
- You have experience providing work estimates, managing feedback & working cohesively with product and client support teams to help plan and prioritize bugs, client issues, and product improvements
- You have a friendly and professional demeanour, enjoy communicating with people all day, and can easily develop a positive rapport
- You can think quickly on your feet and problem solve independently
- You have a sense of humour and your patience is in no short supply
- You have exceptional communication skills, both verbal and written
- You have the ability to multi-task and juggle multiple priorities at once

It's a bonus if:

- You have direct support experience in banking/finance or a SaaS start-up
- You're have experience with Azure IaaS and PaaS.
- You're familiar with a variety of support desk platforms such as TFS, JIRA, etc. and have worked within a Visual Studio/TFS integrated development environment
- You understand the institutional finance space, mortgage loan application processing and maybe a little quality, product management, or client support experience
- You're insanely driven and are committed to success
- You have a post-secondary education
