

1. Within your mortgage file, navigate to the Mortgage Requests section.

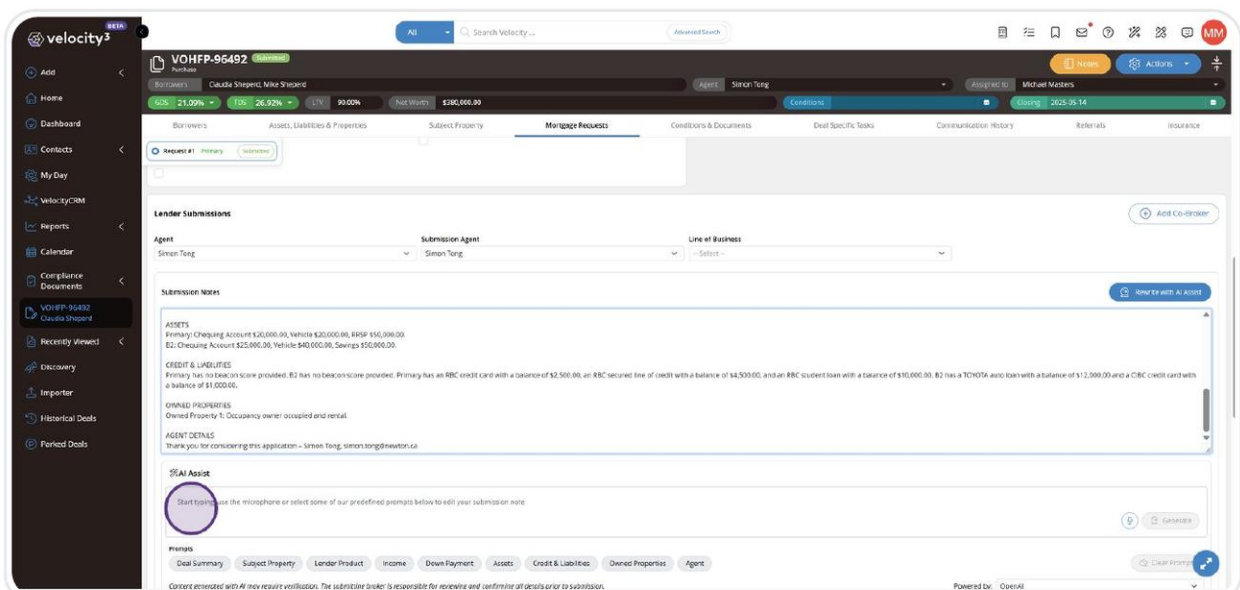

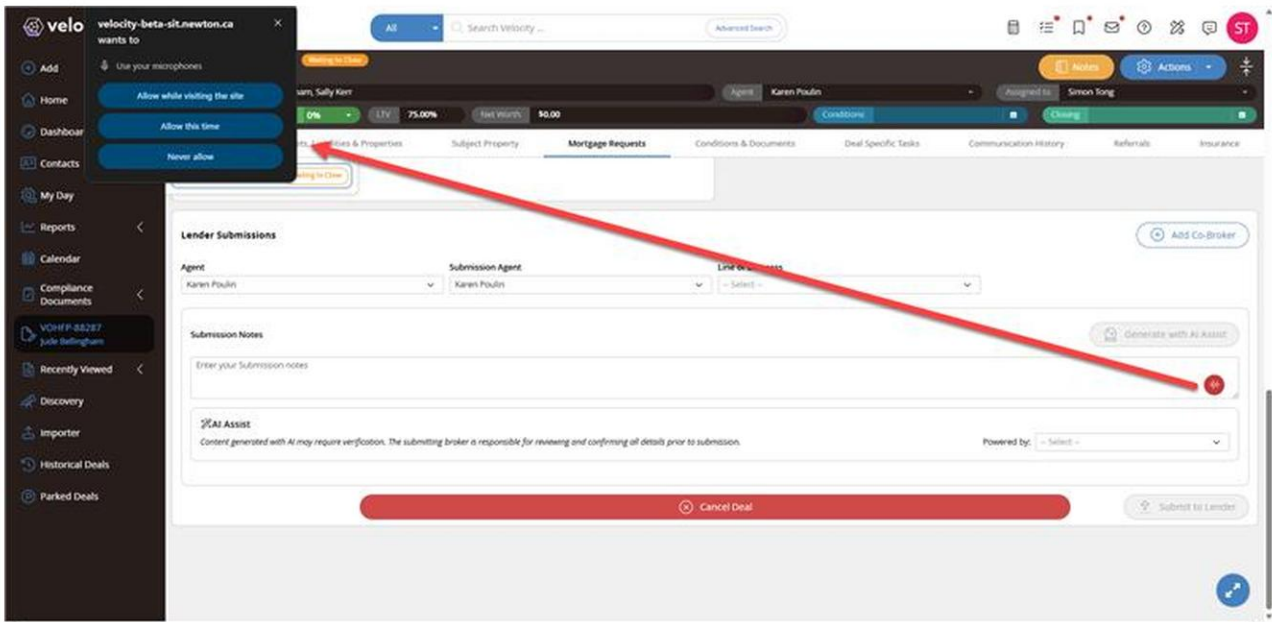

2. Tap 'Generate with AI Assist' to instantly produce professional lender notes powered by advanced AI.

3. You can refine or add to your notes using the voice dictation feature.

Click the dictation button, speak your updates clearly, and the system will convert your speech into text.

The first time you use dictation, your browser will ask for permission to use your microphone. Click the allow option your browser presents, such as Allow while visiting the site, Allow this time, or Allow, so voice dictation can work correctly. Please note: voice dictation is browser-specific.

4. Click generate to use your voice notes.
